Created by
Damien Gautier

LeChaufferie is
a display font based on
overlaped glyphs which
need ligatures and
alternate glyphs to
obtain a perfect result.

This font contains :
- 1200 ligatures
 (two and three letters)
- 26 cropted letters
 (on uppercases)
- 52 alternate glyphs
 (cropted letters
 on the left and on
 the right)

The opentype format and
functions switch auto-
matically single letters
in ligatures.
The 1450 glyphs can also
be selected in the glyph
window.

Examples

Some words need a specific treatment and the both use of ligatures and alternate glyphs placed on uppercases and others available with the "alternate" function in the opentype panel.
